

First International Sialendoscopy Conference

24-25 March 2012, Geneva

 **ESTC**
European Sialendoscopy
Training Centre

The management of disorders of the salivary glands has improved dramatically since the procedure of sialendoscopy. Dr. Francis Marchal has been at the forefront of improving the technique through technical innovations and promoting its use through numerous educational courses throughout the world - all to the benefit of countless numbers of patients.

I personally invite you to attend the first International Sialendoscopy Conference in Geneva in March 2012 which will bring together all the leading specialists in sialendoscopy. This will provide an unparalleled opportunity for those in attendance to learn the techniques of sialendoscopy and its role in the management of salivary gland disorders.

Eugene N. Myers, MD, FACS, FRCS Edin (Hon)
Distinguished Professor and Emeritus Chair Department of Otolaryngology University of Pittsburgh School of Medicine, Pennsylvania, USA

Since 2002, more than 600 physicians from 54 countries have been trained at the European Sialendoscopy Training Center in Geneva (ESTC). A powerful and collaborative network of international sialendoscopy experts from 34 countries has been developed at the ESTC.

This conference - preceded by a course for those interested - will provide a unique platform for these experts to come together to share knowledge, network, exchange ideas, debate and discuss the very latest clinical data and developments.

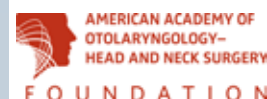

We are extremely happy to invite you to join us in Geneva in March.

Francis Marchal, MD, FACS

CALL FOR ABSTRACTS & TOPICS
